

Circle Activity

Instructions:

1. Brainstorm different types of devices (laptop, desktop paper calendar, landline, etc.) you use to assist with your HIV management.
2. Once you have come up with the devices list them on the right side of this paper.
3. After they are listed think about how far each device would be from the center circle. The closer to the center of the circle the device is indicates that it provides significant help with your HIV Management. The further away the device is indicates it has less impact with your HIV management.
4. Please mark each of one of your devices in the circles with both a dot and a label.
5. Thank you for completing the activity!
